

/home/saurav/Documents  
/Steering Control Module  
/cpp-boilerplate/test/SteeringControl  
OutputTest.cpp

```
graph TD; A["/home/saurav/Documents  
/Steering Control Module  
/cpp-boilerplate/test/SteeringControl  
OutputTest.cpp"] --> B["gtest/gtest.h"]; A --> C["../include/SteeringControl  
Output.h"]
```

The diagram illustrates the file dependencies for the `OutputTest.cpp` file. A central box at the top lists the file's path: `/home/saurav/Documents/Steering Control Module/cpp-boilerplate/test/SteeringControlOutputTest.cpp`. Two arrows point from this box to two other boxes below it. The left box contains `gtest/gtest.h`, and the right box contains `../include/SteeringControlOutput.h`.

gtest/gtest.h

../include/SteeringControl  
Output.h
